## 32-20496: Recombinant Human TWEAK Receptor(Discontinued)

Alternative Name: TNF-related weak inducer of apoptosis receptor, TNFRSF12A, FGF-inducible14, FN14

## **Description**

**Source:E.coli**TWEAKR belongs to the TNF family of transmembrane proteins, and contains a cytoplasmic "death domain", which can activate a cell's apoptotic machinery. It is expressed in the spleen, thymus, peripheral blood lymphocytes, colon, and small intestine. Signal transduction by TWEAKR can be activated by either membrane-anchored or soluble TWEAK. Recombinant Human soluble TWEAKR is a 53 amino acid polypeptide (5.6 kDa) comprising the entire extracellular domain of the full-length TWEAKR protein.

## **Product Info**

Amount:  $5 \mu g / 25 \mu g$ 

**Purification:** Purity:>= 98% by SDS-PAGE gel and HPLC analyses. **Content:** This recombinant protein is supplied in lyophilized form.

Amino Acid: EQAPGTAPCS RGSSWSADLD KCMDCASCRA RPHSDFCLGC AAAPPAPFRL LWP

## **Application Note**

Determined by its ability to inhibit TWEAK-induced weak cell death of HT29 cells. The expected  $\tilde{A} \Box \hat{A}$  ED<sub>50</sub> for this effect is 1.0-3.0  $\tilde{A} \Box \hat{A} \mu g/ml$ .
