

## 44-1175: Anti-Progesterone Receptor Monoclonal Antibody (Clone:IHC651)(Discontinued)

<b>Clonality :</b>	Monoclonal
<b>Clone Name :</b>	IHC651
<b>Application :</b>	IHC
<b>Reactivity :</b>	Human
<b>Gene :</b>	PGR
<b>Gene ID :</b>	5241
<b>Uniprot ID :</b>	P06401
<b>Format :</b>	Purified
<b>Alternative Name :</b>	NR3C3, PGR, PRGR, PR, Nuclear receptor subfamily 3 group C member 3

### Description

Progesterone Receptor (PR), also known as NR3C3 (nuclear receptor subfamily 3, group C, member 3), is an intracellular steroid receptor which mediates the physiological effects of progesterone, a female sex hormone involved in the menstrual cycle, pregnancy, and embryogenesis. Progesterone receptor expression has been linked to the prediction of prognosis in breast cancer, as well as associated responses to endocrine therapy. The progesterone receptor has also been linked to risk for ovarian cancer.

### Product Info

<b>Amount :</b>	0.1 ml / 1 ml
<b>Purification :</b>	Protein A/G Chromatography
<b>Storage condition :</b>	Store at 2°C - 8°C.

### Application Note

Recommended dilutions: Immunohistochemical analysis: 1:100 - 1:200. However, this need to be optimized based on the research applications.
