

## 37-1195: Mouse B7-H3 / CD276 Recombinant Protein (Fc Tag)(Discontinued)

**Reactivity :** Mouse  
**Alternative Name :** 6030411F23Rik Protein, Mouse; AU016588 Protein, Mouse; B7h3 Protein, Mouse; B7RP-2 Protein, Mouse

### Description

#### Source : HEK293 Cells

B7-H3 is a member of the B7 family of immune regulatory ligands that is thought to attenuate peripheral immune responses through co-inhibition. It plays an important role in adaptive immune responses, and was shown to either promote or inhibit T-cell responses in various experimental systems. B7-H3 may play an important role in muscle-immune interactions, providing further evidence of the active role of muscle cells in local immunoregulatory processes. B7-H3 is a novel protein structurally related to the B7 family of ligands by the presence of a single set of immunoglobulin-V-like and immunoglobulin-C-like (VC) domains. Previous studies have correlated its overexpression with poor prognosis and decreased tumor-infiltrating lymphocytes in various carcinomas including uterine endometrioid carcinomas, and mounting evidence supports an immuno-inhibitory role in ovarian cancer prognosis. Recently, B7-H3 expression has been reported in several human cancers indicating an additional function of B7-H3 as a regulator of antitumor immunity. ### Product Info

**Amount :** H3 / CD276 Recombinant Protein (Fc Tag)(Discontinued) / 200 µg  
**Purification :** > 95 % as determined by SDS-PAGE.  
**Content :** Formulation Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization.  
**Storage condition :** Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.  
**Amino Acid :** Met1-Phe244

### Application Note

Endotoxin :< 1.0 EU per 1 µg protein as determined by the LAL method.
