# 37-1358: Mouse VEGFR3 / FLT-4 Recombinant Protein (Fc Tag)(Discontinued)

**Reactivity:** Mouse

Alternative Name: Al323512 Protein, Mouse; Chy Protein, Mouse; Flt-4 Protein, Mouse; VEGFR-3 Protein, Mouse; VEGFR3

Protein, Mouse

# **Description**

### Source: HEK293 Cells

Vascular endothelial growth factor receptor 3 (VEGFR3), also known as FLT-4, together with the other two members VEGFR1 (FLT-1) and VEGFR2 (KDR/Flk-1) are receptors for vascular endothelial growth factors (VEGF) and belong to the class III subfamily of receptor tyrosine kinases (RTKs). The VEGFR3 protein is expressed mainly on lymphatic vessels but it is also upregulated in tumor angiogenesis. Mutations in VEGFR3 have been identified in patients with primary lymphoedema. The VEGF-C/VEGF-D/VEGFR3 signaling pathway may provide a target for antilymphangiogenic therapy in prostate cancer, breast cancer, gastric cancer, lung cancer, non-small cell lung cancer (NSCLC), and so on. Cancer Immunotherapy Immune Checkpoint Immunotherapy Targeted Therapy

#### **Product Info**

**Amount :** 4 Recombinant Protein (Fc Tag)(Discontinued) / 100 μg

**Purification:** > 92 % as determined by SDS-PAGE

Formulation Lyophilized from sterile PBS, pH 7.4

**Content:** Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before

lyophilization.

Storage condition:

Storage condition:

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be

aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Amino Acid: Met1-Glu775

### **Application Note**

Endotoxin :< 1.0 EU per ̸µq of the protein as determined by the LAL method
