## 36-2546: Anti-IgG (Immunoglobulin Gamma Heavy Chain) (B-Cell Marker) Polyclonal Antibody

| Clonality : | Polyclonal |
| :--- | :--- |
| Application : | IHC |
| Reactivity : | Human |
| Gene : | IGHG |
| Gene ID : | $3500 ; 3501 ; 3502 ; 3503$ |
| Uniprot ID : | P01857; P01859; P01860; P01861 |
|  | G1m Marker; G2m Marker; G3m Marker; G4m Marker; HDC; Heavy Chain Disease Protein; |
| Alternative Name : | Human Immunglobulin G; Ig gamma1/2/3/4 Chain C Region; IGHG1; IGHG2; IGHG3; IGHG4; <br>  <br> Immunoglobulin Heavy Constant 1/2/3/4 |
| Imotype : Rabbit IgG <br> Immunogen Information Purified human Ig Gamma Chain |  |

## Description

Recognizes a protein of 75 kDa , identified as gamma heavy chain of human immunoglobulins. It does not cross-react with alpha (IgA), mu (IgM), epsilon (IgE), or delta (IgD), heavy chains, T-cells, monocytes, granulocytes, or erythrocytes. This antibody is useful in the identification of leukemias, plasmacytomas, and certain non-Hodgkin's lymphomas. The most common feature of these malignancies is the restricted expression of a single heavy chain class. Demonstration of clonality in lymphoid infiltrates indicates that the infiltrate is clonal and therefore malignant.

## Product Info

Amount: $\quad 20 \mu \mathrm{~g} / 100 \mu \mathrm{~g}$
Content : $\quad 200 \mu \mathrm{~g} / \mathrm{ml}$ of Ab Purified by Protein A. Prepared in 10 mM PBS with $0.05 \%$ BSA \& $0.05 \%$ azide. Also available WITHOUT BSA \& azide at $1.0 \mathrm{mg} / \mathrm{ml}$.
Antibody with azide - store at 2 to $8^{\circ} \mathrm{C}$. Antibody without azide - store at -20 to $-80^{\circ} \mathrm{C}$. Antibody is stable for 24 months. Non-hazardous.

## Application Note

Immunohistochemistry (Formalin-fixed) ( $1-2 \mathrm{ug} / \mathrm{ml}$ for 30 minutes at RT)(Staining of formalin-fixed tissues requires heating tissue sections in 10 mM Tris with 1 mM EDTA, pH 9.0 , for 45 min at $95 \& \mathrm{degC}$ followed by cooling at RT for 20 minutes);
