

32-6257: SARS Membrane Protein

Alternative Name : SARS Membrane

Description

Source : Escherichia Coli.

The E.coli derived recombinant protein contains the Membrane protein immunodominant regions fused to 6xHis tag at C-terminal.

SARS Membrane protein is a membranal protein which plays a crucial role in the virusÂ' life cycle. This protein has 3 outer cell structural antigens, the envelope (E), membrane (M)and spike (S) antigens. SARS Membrane protein is essential to the process of assembly, budding, creation of the envelope and pathogenesis.

Product Info

Amount :	50 μg / 0.25 mg
Purification :	Protein is >90% pure as determined SDS-PAGE.
Content :	SARS Membrane protein solution is supplied in PBS.
Storage condition :	Protein is shipped on ice packs. Upon arrival, Store at -20°C.
