

## 32-6260: SARS Nucleocapsid Proteins

**Alternative Name :** SARS Nucleocapsid, 1-49 a.a.

### Description

Source : Escherichia Coli.

The E.coli derived recombinant protein contains the Nucleocapsid protein 1-49 amino acids immunodominant regions. The SARS Nucleocapsid is a protein that has a crucial structural importance, by making the virions associates with the RNA genome and therefore create a nucleocapsid that has the specific helical form. There has been found 3 different domain structures to the nucleocapsid antigen. This protein contains 3 outer structural proteins, the membrane (M), envelope (E), and spike (S) proteins.

### Product Info

<b>Amount :</b>	50 µg / 0.25 mg
<b>Purification :</b>	Protein is >90% pure as determined SDS-PAGE.
<b>Content :</b>	SARS Nucleocapsid protein solution is supplied in PBS.
<b>Storage condition :</b>	Protein is shipped on ice packs. Upon arrival, Store at -20°C.
