

90-7002: Mouse ACE2 ELISA Kit

Application : ELISA

Reactivity : Mouse

Description

Carboxypeptidase which converts angiotensin I to angiotensin 1-9, a peptide of unknown function, and angiotensin II to angiotensin 1-7, a vasodilator. Also able to hydrolyze apelin-13 and dynorphin-13 with high efficiency. May be an important regulator of heart function. May have a protective role in acute lung injury..

Angiotensin I-converting enzyme 2(ACE 2) is a protein belongs to the angiotensin-converting enzyme family of dipeptidyl carboxydipeptidases and has considerable homology to human angiotensin 1 converting enzyme. By sequence similarity to a sequence in GenBank, this gene is mapped to Xp22.2. This secreted protein catalyzes the cleavage of angiotensin I into angiotensin 1-9, and angiotensin II into the vasodilator angiotensin 1-7. The organ- and cell-specific expression of this gene suggests that it may play a role in the regulation of cardiovascular and renal function, as well as fertility. In addition, the encoded protein is a functional receptor for the spike glycoprotein of the human coronaviruses SARS and HCoV-NL63.

Product Info

Amount : 1 X 96 Tests

Content : 1 X 96 well Format (96 tests)

Application Note

This immunoassay kit allows for the in vitro quantitative determination of Mouse ACE2 concentrations in cell culture supernates serum and plasma(heparin).

Detection Range: 62.5pg ml-4000 pg/ml

Sensitivity: 10 pg/ml
