11-2006: Polyclonal ACE2 antibody

Clonality: Polyclonal Application: ELISA,WB Gene: ACE2 Gene ID: 59272 **Uniprot ID:** Q9BYF1 Format: **Purified**

Angiotensin-converting enzyme homolog, Angiotensin-converting enzyme-related **Alternative Name:**

carboxypeptidase, Metalloprotease MPROT15

Isotype: Rabbit IgG

A partial length recombinant ACE2 protein (amino acids 507-678) was used as the immunogen Immunogen Information:

for this antibody.

Description

Angiotensin-converting enzyme2 (ACE2) is an ectoenzyme (carboxypeptidase) with an extracellular catalytic domain that predominantly localizes at the plasma membrane and is thereby able to hydrolyze circulating peptides. ACE2 has approximately 42% sequence identity with ACE, and its cytoplasmic and transmembrane domains show 48% homology to the protein collectrin that plays a critical role in the amino acid absorption of the kidney. ACE2 converts angiotensin I to angiotensin 1-9, a peptide of unknown function, and angiotensin II to angiotensin 1-7, a vasodilator. ACE2 is involved in the regulation of systemic blood pressure and has direct effects on cardiac functions. It is expressed predominantly in endothelial cells of the lung, gut, heart and kidney. ACE2 together with the protease TMPRSS2 acts as a functional receptor for SARS coronavirus as well as for the new highly pathogenic coronavirus, 2019-nCoV/SARS-CoV-2, which is cause for pneumonia COVID-19.

Product Info

Amount: 25 μg / 100 μg

Purification: Protein A Chromatography

25 μg in 50 μl/100 μg in 200 μl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium Content:

azide is highly toxic.

Store the antibody at 4°C, stable for 6 months. For long-term storage, store at -20°C. Avoid Storage condition:

repeated freeze and thaw cycles.

Application Note

Recommended dilutions: WB: 05-1 µg/ml. However, this need to be optimized based on the research applications.
