# 12-4182: Phospho-SLP-76 (Tyr128) (Clone: 3F8) rabbit mAb SureLight488 conjugate 

## Clonality :

Clone Name :
Application :
Reactivity :
Conjugate:
Format :

## Alternative Name:

## Isotype:

Immunogen Information :

Monoclonal
SLP76Y128-3F8
FACS
Human, Mouse
SureLight 488
Conjugated
Lymphocyte cytosolic protein 2, SH2 domain-containing leukocyte protein of 76 kDa , SLP76, LCP2
Rabbit IgG1k
A synthetic phospho-peptide corresponding to residues surrounding Tyr128 of human phospho SLP-76

## Description

SH2 Domain-Containing Leukocyte Protein Of 76 KDa (SLP-76) is an adaptor protein that plays a role in signal transduction in T cells. Studies using a SLP-76-deficient T cell line have demonstrated that SLP-76 is required for optimal phosphorylation and activation of both PLCg1 and the Ras pathway. SLP-76 phosphorylation is mediated by Zap70 upon TCR stimulation. Within an N-terminal acidic region, SLP-76 possesses three tyrosines (Tyr113, 128, and 145), which are phosphorylated upon activation. The sterile alpha-motif (SAM) domain of SLP-76 drives formation of dimers and higher order oligomers. SLP-76 micro-clusters at the immunological synapse enhance signal transduction and $T$ cell activation.

## Product Info

Amount: $\quad 10$ Tests / 100 Tests
Content: $\quad 1 X$ PBS, $0.09 \%$ NaN3, $0.2 \%$ BSA
Storage condition : $\quad$ Store at $2-8^{\circ} \mathrm{C}$. Avoid repeated freeze and thaw cycles.

## Application Note

For flow cytometric staining, the suggested use of this reagent is $5 \tilde{A} \square \hat{A} \mu \mathrm{~L}$ per million cells or $5 \tilde{A} \square \hat{A} \mu \mathrm{~L}$ per $100 \tilde{A} \square \hat{A} \mu \mathrm{~L}$ of staining volume. It is recommended that the reagent be titrated for optimal performance for each application.

Fig-1: Flow cytometric analysis of Ramos cells unstained untreated cells as negative control (blue) or stained untreated (red) or treated with pervanadate (green) using phospho-SLP-76 (Tyr128) antibody SLP76Y128-3F8 SureLight 488 conjugate.
