12-4244: Phospho-Lck (Tyr505) (Clone: A3) rabbit mAb FITC conjugate

Clonality: Monoclonal
Clone Name: LckY505-A3
Application: FACS
Reactivity: Human
Conjugate: FITC
Format: Conjugated

Alternative Name: Tyrosine-protein kinase Lck, Leukocyte C-terminal Src kinase, LSK, Protein YT16, T cell-specific

protein-tyrosine kinase

Isotype: Rabbit IgG1k

Immunogen Information: A synthetic phospho-peptide corresponding to residues surrounding Tyr505 of human

phospho Lck

Description

Lck is a member of the Src family of non-receptor tyrosine kinases and plays a major role in T cell activation. Lck activates many downstream signaling pathways including Akt/mTOR, SAPK/JNK, PLCg1, and RAS/MAPK. Phosphorylation of Lck at Tyr394 in the catalytic domain at the ATP-binding site stabilizes the open and active form, while phosphorylation at Tyr505 in the C-terminal domain promotes the closed, inactive conformation. Multiple small-molecule drugs used to treat leukemia have been shown to target inhibition of Lck, including imatinib and dasatinib. Lck is thus a promising target for suppressing T-cell responses for the treatment of inflammatory diseases or after organ transplantation.

Product Info

Amount: 10 Tests / 100 Tests

Content: 1X PBS, 0.09% NaN3, 0.2% BSA

Storage condition : Store at 2-8°C. Avoid repeated freeze and thaw cycles.

Application Note

For flow cytometric staining, the suggested use of this reagent is $5 \text{ A} \triangle \mu \text{L}$ per million cells or $5 \text{ A} \triangle \mu \text{L}$ per 100 $\text{A} \triangle \mu \text{L}$ of staining volume. It is recommended that the reagent be titrated for optimal performance for each application. See product image legends for additional information.
