## 12-4246: Phospho-Lck (Tyr505) (Clone: A3) rabbit mAb SureLight488 conjugate

Clonality: Monoclonal
Clone Name: LckY505-A3
Application: FACS
Reactivity: Human

Conjugate: SureLight 488
Format: Conjugated

Alternative Name: Tyrosine-protein kinase Lck, Leukocyte C-terminal Src kinase, LSK, Protein YT16, T cell-specific

protein-tyrosine kinase

**Isotype:** Rabbit IgG1k

Immunogen Information: A synthetic phospho-peptide corresponding to residues surrounding Tyr505 of human

phospho Lck

## **Description**

Lck is a member of the Src family of non-receptor tyrosine kinases and plays a major role in T cell activation. Lck activates many downstream signaling pathways including Akt/mTOR, SAPK/JNK, PLCg1, and RAS/MAPK. Phosphorylation of Lck at Tyr394 in the catalytic domain at the ATP-binding site stabilizes the open and active form, while phosphorylation at Tyr505 in the C-terminal domain promotes the closed, inactive conformation. Multiple small-molecule drugs used to treat leukemia have been shown to target inhibition of Lck, including imatinib and dasatinib. Lck is thus a promising target for suppressing T-cell responses for the treatment of inflammatory diseases or after organ transplantation.

## **Product Info**

Amount: 10 Tests / 100 Tests

**Content:** 1X PBS, 0.09% NaN3, 0.2% BSA

**Storage condition :** Store at 2-8°C. Avoid repeated freeze and thaw cycles.

## **Application Note**

For flow cytometric staining, the suggested use of this reagent is 5  $\tilde{A} \square \hat{A} \mu L$  per million cells or 5  $\tilde{A} \square \hat{A} \mu L$  per 100  $\tilde{A} \square \hat{A} \mu L$  of staining volume. It is recommended that the reagent be titrated for optimal performance for each application.
