12-4286: Phospho-SAPK/JNK (Thr183/Tyr185) (Clone: A11) rabbit mAb PE conjugate

| Clonality : | Monoclonal |
|-----------------------|--|
| Clone Name : | SAPKT183Y185-A11 |
| Application : | FACS |
| Reactivity : | Human |
| Conjugate : | PE |
| Format : | Conjugated |
| Alternative Name : | Mitogen-activated protein kinase 8, MAPK8, Stress-activated protein kinase 1c, SAPK1c, c-Jun N-terminal kinase 1, JNK1, PRKM8 |
| Isotype : | Rabbit IgG1k |
| Immunogen Information | A synthetic phospho-peptide corresponding to residues surrounding Thr183/Tyr185 of human phospho SAPK/JNK |

Description

The SAPK/JNK pathway initiates apoptosis upon exposure to radiation, UV exposure, heat shock, oxidative stress, and other stressors. Upon exposure to environmental stress, the SAPK/JNK signaling pathway sequentially activates the proteins MEKK1, SEK1, SAPK, and c-Jun. Upstream activators of the SAPK/JNK cascade include ceramide, small GTP-binding proteins such as Rac1 and Cdc42Hs, Ask1, and caspases. MKK7 is also a major and direct SAPK/JNK activator in the TNF alpha or environmental stress signaling pathways, where its kinase activity directly phosphorylates SAPK/JNK. This relationship between MKK7 and SAPK appears to be evolutionarily conserved, as it is preserved in their Drosophila homologues, Hep and DJNK, respectively.

Product Info

| Amount : | 10 Tests / 100 Tests |
|---------------------|--|
| Content : | 1X PBS, 0.09% NaN3, 0.2% BSA |
| Storage condition : | Store at 2-8°C. Avoid repeated freeze and thaw cycles. |

Application Note

For flow cytometric staining, the suggested use of this reagent is 5 $\tilde{A} \square \hat{A} \mu L$ per million cells or 5 $\tilde{A} \square \hat{A} \mu L$ per 100 $\tilde{A} \square \hat{A} \mu L$ of staining volume. It is recommended that the reagent be titrated for optimal performance for each application. See product image legends for additional information.
