## 32-9064: Recombinant Human ACE2 Protein (C-His)

**Alternative Name :** Angiotensin-Converting Enzyme 2; ACE-Related Carboxypeptidase; Angiotensin-ConvertingEnzyme Homolog; ACEH; Metalloprotease MPROT15; ACE2

## **Description**

Source: HEK293;

Angiotensin-Converting Enzyme 2 (ACE-2) is an integral membrane protein and a zinc metalloprotease of the ACE family, the ACE family includes somatic and germinal ACE. ACE-2 cleaves angiotensin I and II as a carboxypeptidase and converts angiotensin I to angiotensin 1-9, and angiotensin II to angiotensin 1-7. ACE-2 is also able to hydrolyze apelin-13 and dynorphin-13 with high efficiency. ACE-2 can be high expressed in testis, kidney and heart, in colon, small intestine and ovary at moderate levels. Captopril and lisinopril as the classical ACE inhibitor do not inhibit ACE-2 activity. ACE-2 may play an important role in regulating the heart function.

## **Product Info**

**Amount :** 500 μg / 50 μg

Content: Lyophilized from a 0.2 um filtered solution of PBS, pH7.4

Amino Acid: Recombinant Human ACE2 Protein is produced by HEK293. The target gene encoding 18-740 is

expressed with a 8His tag at the C-terminus.
