## 32-9129: Recombinant Human Angiopoietin-related protein 4/ANGPTL4 (N-FLAG)

Alternative Name: ANGPTL4; ANGPTL2; ARP4; FIAF; HFARP; NL2; PGAR; pp1158; Angiopoietin like 4

## **Description**

Source: Human 293 Cells;

Angiopoietin-related protein 4 (ANGPTL4) is a secreted protein that shares structural homology with angiopoietins. ANGPTL4 is highly expressed in adipose tissues. It is up-regulated in endothelial cells and cardiomyocytes during hypoxia. ANGPTL4 contains an N-terminal coiled-coil region that facilitates covalent homo-oligomerization as well as a C-terminal fibrinogen-like domain. The homo-oligomer undergoes proteolytic processing and releases its C-terminal domain, which circulates as a monomer. ANGPTL4 participates in the regulation of lipid and glucose metabolism. ANGPTL4 may also act as a regulator of angiogenesis and modulate tumorigenesis.

## **Product Info**

**Amount :** 500 μg / 50 μg

Content: Supplied as a 0.2 um filtered solution of PBS, pH 7.4

Amino Acid: Recombinant Human Angiopoietin-related protein 4 is produced by Human 293 Cells. The target

gene encoding P166-S406 is expressed with a FLAG tag at the N terminus.
