

32-9447: Recombinant Human Angiopoietin-Like Protein 8/ANGPTL8/Betatrophin (C-6His)(Discontinued)

Alternative Name : Betatrophin,Angiopoietin-like protein 8,Lipasin,Angptl8

Description

Source : E. coli;

The protein specifically promotes pancreatic beta cell proliferation and beta cell mass expansion, thereby improving glucose tolerance. It promotes pancreatic beta cell proliferation without insulin resistance. Also it acts as a blood lipid regulator by regulating serum triglyceride levels and possibly by promoting ANGPTL3 cleavage. It interacts with ANGPTL3. It predominantly expressed in liver and also expressed in adipose tissues. The ability of the protein to induce pancreatic beta cell proliferation is promising in diabetes therapy. Betatrophin treatment could supply or replace insulin injections by increasing the number of insulin-producing cells in diabetes.

Product Info

Amount : 500 µg / 50 µg

Content : Lyophilized from a 0.2 µm filtered solution of 20mM Tris,150mM NaCl, pH 8.0.

Amino Acid : Recombinant Human Angiopoietin-like protein 8 is produced by our E.coli expression system and the target gene encoding Ala22-Ala198 is expressed with a 6His tag at the C-terminus.
