32-9563: Recombinant Human Interleukin-2/IL-2 (Mutant)

Alternative Name: Interleukin-2; IL-2; T-Cell Growth Factor; TCGF; Aldesleukin; IL2

Description

Source: Human Cells;

Interleukin-2(IL-2) is an interleukin, a type of cytokine signaling molecule in the immune system, belongs to the IL-2 family. It is a powerful immunoregulatory lymphokine produced by T-cells in response to antigenic or mitogenic stimulation. IL-2/IL-2R signaling is required for T-cell proliferation and other fundamental functions that are essential for the immune response. IL-2 stimulates growth and differentiation of B-cells, NK cells, lymphokine-activated killer cells, monocytes, macrophages and oligodendrocytes. New research has shown that IL-2 mutant reduced toxicity while being more potent at stimulating antitumor effector immune cells.

Product Info

Amount : 500 μg / 50 μg

Content: Lyophilized from a 0.2 µm filtered solution of PBS, pH7.4.

Amino Acid: Recombinant Human IL-2 Superkine is produced by our Mammalian expression system and the

target gene encoding Ala21-Thr153(L100F,R101D,L105V,I106V,I112F) is expressed with a 6His

tag at the C-terminus.Â
