

## 32-9646: Recombinant Human Platelet Receptor Gi24/VISTA/B7-H5/PD-1H (C-mFc)

**Alternative Name :** Platelet receptor Gi24;Stress-induced secreted protein-1;Sisp-1;C10orf54;SISP1

### Description

Source : Human Cells;

platelet receptor Gi24 is a single-pass type I membrane protein, and located at the cell surface. The protein can be cleaved by MMP14, and stimulate MMP14-mediated MMP2 activation. It is participated in the BMP signaling pathway. It also regulates the CD4-positive, alpha-beta T cell proliferation, and T cell cytokine production negatively. However, the protein can regulate stem cell differentiation positively.

### Product Info

**Amount :** 500 µg / 50 µg

**Content :** Lyophilized from a 0.2 µm filtered solution of PBS, pH7.4.

**Amino Acid :** Recombinant Human Platelet Receptor Gi24 is produced by our Mammalian expression system and the target gene encoding Phe33-Ala194 is expressed with a mFc tag at the C-terminus.
