

32-6315: BNP (27-102) Human

Alternative Name : NPPB, Natriuretic Peptide Precursor B, BNP, B-type Natriuretic Peptide.Å

Description

Source: Escherichia Coli.

Filtered White lyophilized (freeze-dried) powder.

Natriuretic Peptide Precursor B acts as a cardiac hormone with a variety of biological actions including natriuresis, diuresis, vasorelaxation, and inhibition of renin and aldosterone secretion. It is thought to play a key role in cardiovascular homeostasis. Helps restore the body's salt and water balance. Improves heart function.

BNP Human Recombinant produced in E.Coli is a single, non-glycosylated, polypeptide chain (a.a 27-102) containing 83 amino acids including a 7 a.a N-terminal His tag. The total molecular mass is 9.4kDa (calculated).Å

Product Info

Amount : 2 µg / 10 µg

Purification : Greater than 95.0% as determined by SDS-PAGE.

BNP filtered (0.4 µm) and lyophilized from 0.5mg/ml in 20 mM Tris buffer and 50 mM NaCl, pH 7.5.

Content : It is recommended to add deionized water to prepare a working stock solution of approximately 0.5mg/ml and let the lyophilized pellet dissolve completely. BNP is not sterile! Please filter the product by an appropriate sterile filter before using it in the cell culture.

Storage condition : Store lyophilized protein at -20°C. Aliquot the product after reconstitution to avoid repeated freezing/thawing cycles. Reconstituted protein can be stored at 4°C for a limited period of time; it does not show any change after two weeks at 4°C.
