Preinterleukin 1 beta, Pro interleukin 1 beta.

Description

Source: E.coli.

Sterile Filtered colorless solution.

Interleukin-1 beta is a cytokine that causes inflammation and can regulate angiogenesis through interaction with vascular endothelial cells or promoting the creation of proangiogenic modulators through the paracrine system. The cytokine causes migration and proliferation of endothelial cells, creation of mediators to inflammation, expression of adhesion-molecules & recruit of leukocyte cells. Interleukin-1 beta was found crucial for the process of tumors in various organism models. Â IL1B Mouse Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 189 amino acids (118-269 a.a) and having a molecular mass of 21kDa.IL1B is fused to a 37 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques.
