## 32-6420: IL2 Feline

## Application: Functional Assay

Alternative Name : Interleukin-2, IL-2, T-cell growth factor, TCGF, IL2.

## Description

Source: E.coli.
Sterile Filtered colorless solution.
IL2 is a secreted cytokine that is important for the proliferation of $T$ and $B$ lymphocytes. The receptor of this cytokine is a heterotrimeric protein complex whose gamma chain is also shared by interleukin 4 (IL4) and interleukin 7 (IL7). The expression of this gene in mature thymocytes is monoallelic, which represents an unusual regulatory mode for controlling the precise expression of a single gene. The targeted disruption of a similar gene in mice leads to ulcerative colitis-like disease, which suggests an essential role of this gene in the immune response to antigenic stimuli.
IL2 Feline Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 157 amino acids (21-154 a.a) and having a molecular mass of 17.8 kDa . IL2 is fused to a 23 amino acid His-tag at N-terminus \& purified by proprietary chromatographic techniques.

## Product Info

## Amount:

## Purification :

Content :

## Storage condition :

## Amino Acid :

$1 \mu \mathrm{~g} / 5 \mu \mathrm{~g}$
Greater than $95 \%$ as determined by SDS-PAGE.
IL2 protein solution $(0.25 \mathrm{mg} / \mathrm{ml})$ containing 20 mM Tris- $\mathrm{HCl}(\mathrm{pH} 8.0), 0.15 \mathrm{M} \mathrm{NaCl}$ and $30 \%$ glycerol.
Store at $4^{\circ} \mathrm{C}$ if entire vial will be used within $2-4$ weeks. Store, frozen at $-20^{\circ} \mathrm{C}$ for longer periods of time. For long term storage it is recommended to add a carrier protein $(0.1 \% \mathrm{HSA}$ or BSA).Avoid multiple freeze-thaw cycles.

## Application Note

Measured in a cell proliferation assay using CTLL2 mouse cytotoxic $T$ cells. The ED50 for this effect is less or equal to $0.3 \mathrm{ng} / \mathrm{ml}$.
