

32-6431: IL 6 Mouse, Sf9

Application : Functional Assay

Alternative Name : Interleukin-6, IL-6, B-cell hybridoma growth factor, Interleukin HP-1.

Description

Source: Sf9, Baculovirus cells.

Sterile Filtered colorless solution.

IL-6 is a cytokine with a wide variety of biological functions: it plays an essential role in the final differentiation of b-cells into ig-secreting cells, it induces myeloma and plasmacytoma growth, it induces nerve cells differentiation, in hepatocytes it induces acute phase reactants.

Interleukin-6 Mouse Recombinant produced in Sf9 Baculovirus cells is a single, glycosylated polypeptide chain containing 193 amino acids (25-211a.a.) and having a molecular mass of 22.5kDa (Molecular size on SDS-PAGE will appear at approximately 18-28kDa). IL6 is expressed with a 6 amino acid His tag at C-Terminus and purified by proprietary chromatographic techniques.
