

32-6432: IL6 Rat, sf9

Application : Functional Assay

Alternative Name : IL6, Ifnb2, ILg6.

Description

Source: Sf9, Baculovirus cells.

Sterile Filtered colorless solution.

Interleukin-6 is a potent pro-inflammatory cytokine primarily produced by activated T cells and an assortment of other cells including endothelial cells and macrophages. IL-6 affects B and T lymphocytes and has been shown to have a role in host defense, acute phase reactions, immune responses and hematopoiesis.

IL6 produced in Sf9 Baculovirus cells is a single, glycosylated polypeptide chain containing 196 amino acids (25-211 a.a.) and having a molecular mass of 22.8kDa (Molecular size on SDS-PAGE will appear at approximately 18-28 kDa). IL6 is expressed with a 6 amino acid His tag at C-Terminus and purified by proprietary chromatographic techniques.
