

32-6936: TPST2 Human, sf9

Alternative Name :

Tyrosylprotein Sulfotransferase 2, EC 2.8.2.20, TPST-2, Transport And Golgi Organization 13 Homolog B (Drosophila), Transport And Golgi Organization 13 Homolog B, Protein-Tyrosine Sulfotransferase 2, Tyrosylprotein Phosphotransferase 2, Tyrosylprotein Sulfotransferase-2, TANGO13B.

Description

Source: Sf9, Baculovirus cells.

Sterile Filtered colorless solution.

Tyrosylprotein Sulfotransferase 2 (TPST2) is a member of the protein sulfotransferase family. TPST2 is a widely expressed protein, which catalyzes the O-sulfation of tyrosine residues within acidic regions of proteins. The TPST2 protein is a type II integral membrane protein located in the Golgi body.

TPST2 produced in Sf9 Baculovirus cells is a single, glycosylated polypeptide chain containing 361 amino acids (26-377 a.a.) and having a molecular mass of 40.4kDa (Migrates at 40-57kDa on SDS-PAGE under reducing conditions).Å

Product Info

Amount :

2 µg / 10 µg

Purification :

Greater than 95.0% as determined by SDS-PAGE.

Content :

TPST2 protein solution (0.25mg/ml) contains Phosphate Buffered Saline (pH 7.4) and 10% glycerol.

Storage condition :

Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.

Amino Acid :
