

## 32-13033: ANTXR2 Mouse

**Alternative Name :** Anthrax toxin receptor 2, Antxr2.

### Description

Source: Sf9 Insect cells.

Sterile Filtered colorless solution.

Anthrax toxin receptor 2, also known as ANTXR2, takes part in the configuration of little blood vessels (capillaries). ANTXR2 helps the toxin that leads to anthrax to attach to cells and trigger illness. ANTXR2 is necessary for cellular interactions with laminin and the extracellular matrix.

ANTXR2 produced in Sf9 Insect cells is a single, glycosylated polypeptide chain containing 295 amino acids (32-318aa) and having a molecular mass of 31.9kDa (Molecular size on SDS-PAGE will appear at approximately 28-40kDa).ANTXR2 is expressed with an 8 amino acid His tag at C-Terminus and purified by proprietary chromatographic techniques.

### Product Info

**Amount :** 1 µg / 5 µg

**Purification :** Greater than 95% as determined by SDS-PAGE.

**Content :** ANTXR2 protein solution (0.5mg/ml) contains Phosphate Buffered Saline (pH 7.4) and 10% glycerol.

**Storage condition :** Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Avoid multiple freeze-thaw cycles.
