

## 32-13200: EDA2R Human, Sf9

### Alternative Name :

Tumor necrosis factor receptor superfamily member 27, X-linked ectodysplasin-A2 receptor, EDA-A2 receptor, Ectodysplasin A2 Receptor, X-Linked Ectodysplasin-A2 Receptor, EDA-A2 Receptor, TNFRSF27, XEDAR, Tumor Necrosis Factor Receptor Superfamily Member XEDAR, Tumor Necrosis Factor Receptor Superfamily Member 27, Ectodysplasin A2 Isoform Receptor, EDA-A2R, EDAA2R.

### Description

Source: Sf9, Baculovirus cells.

Sterile Filtered clear solution.

EDA2R (ectodysplasin A2 receptor) mediates the activation of the NF-kappa-B and JNK pathways. Activation seems to be mediated through binding to TRAF3 and TRAF6. In addition, Mutations in EDA give rise to a clinical syndrome characterized by loss of hair, sweat glands, and teeth. EDA2R specifically binds to EDA-A2 isoform. This protein is a type III transmembrane protein of the TNFR (tumor necrosis factor receptor) superfamily, and contains 3 cysteine-rich repeats and a single transmembrane domain however it lacks an N-terminal signal peptide. Alternatively spliced transcript variants have been found for this gene. Among the diseases associated with EDA2R are ectodermal dysplasia 1, hypohidrotic, x-linked, and hypohidrotic ectodermal dysplasia.

EDA2R Human Recombinant produced in Sf9 Baculovirus cells is a single, glycosylated polypeptide chain containing 380 amino acids (1-138a.a.) and having a molecular mass of 42.5kDa (Molecular size on SDS-PAGE will appear at approximately 40-57kDa). EDA2R is expressed with a 242 amino acid hlgG-His tag at C-Terminus and purified by proprietary chromatographic techniques.

### Product Info

**Amount :** 2 µg / 10 µg

**Purification :** Greater than 90.0% as determined by SDS-PAGE.

**Content :** EDA2R protein solution (0.5mg/ml) contains Phosphate Buffered Saline (pH 7.4), 20% glycerol and 1mM DTT.

**Storage condition :** Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Please avoid freeze thaw cycles.
