

32-13212: ENTPD6 Human

Alternative Name : ectonucleoside triphosphate diphosphohydrolase 6 isoform 1, CD39L2, dj738P15.3, IL-6SAG, IL6ST2, NTPDase-6.

Description

Source: Escherichia Coli.

Sterile Filtered clear solution.

Ectonucleoside Triphosphate Diphosphohydrolase 6 or ENTPD6 is an enzyme, akin to E-type nucleotidases. E-type nucleotidases, for instance CD39, are responsible for extracellular nucleotides catabolism. ENTPD6 has four apyrase-conserved areas like all to E-type nucleotidases. Rather spliced transcript agents that codes various isoforms were discovered for the DNA segment.

ENTPD6 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 447amino acids (61-484a.a.) and having a molecular mass of 48.7kDa. ENTPD6 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques.

Product Info

Amount : 5 µg / 20 µg

Purification : Greater than 80.0% as determined by SDS-PAGE.

Content : ENTPD6 protein solution (1mg/ml) containing 20mM Tris-HCl buffer (pH 8.0), 10% glycerol and 0.4M urea.

Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
