Description

Source: Escherichia Coli.

Sterile Filtered colorless solution.

Sarcoglycan Beta, also known as SGCB, is a part of the sarcoglycan family. SGCB belongs to the sarcoglycan complex which is a subcomplex of the dystrophin-glycoprotein complex that connects between the F-actin cytoskeleton and the extracellular matrix.

SGCB Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 255 amino acids (87-318 a.a) and having a molecular mass of 27.8kDa.
