

32-17215: Recombinant human VSIG4 protein with C-terminal human Fc tag

Alternative Name : CRIG; Z39IG

Description

Expression Host : HEK293

The protein has a predicted molecular mass of 54.56 kDa after removal of the signal peptide.

This gene encodes a v-set and immunoglobulin-domain containing protein that is structurally related to the B7 family of immune regulatory proteins. The encoded protein may be a negative regulator of T-cell responses. This protein is also a receptor for the complement component 3 fragments C3b and iC3b. Alternate splicing results in multiple transcript variants.

Product Info

| | |
|----------------------------|---|
| Amount : | 50 µg |
| Purification : | The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining. |
| Content : | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose is added as protectants before lyophilization. |
| Storage condition : | Store at -80°C for 12 months (Avoid repeated freezing and thawing) |
