

32-17306: Recombinant human GUCY2C protein with C-terminal human Fc tag(Discontinued)**Alternative Name :** DIAR6, GC-C, GUC2C, MECIL, MUCIL, STAR**Description**

Expression Host : HEK293

The protein has a predicted molecular mass of 63.25 kDa after removal of the signal peptide.

This gene encodes a transmembrane protein that functions as a receptor for endogenous peptides guanylin and uroguanylin, and the heat-stable E. coli enterotoxin. The encoded protein activates the cystic fibrosis transmembrane conductance regulator. Mutations in this gene are associated with familial diarrhea (autosomal dominant) and meconium ileus (autosomal recessive).

Product Info

Amount :	50 µg / 100 µg
Purification :	The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.
Content :	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose is added as protectants before lyophilization.
Storage condition :	Store at -80°C for 12 months (Avoid repeated freezing and thawing)
