

30-2569: Anti-CD370 Antibody (Clone : 8F9)

Clonality :	Monoclonal
Clone Name :	8F9
Application :	FACS , ICC
Reactivity :	Human
Gene :	CLEC9A
Gene ID :	283420
Format :	Purified
Alternative Name :	CLEC9A, DNGR1, DNGR-1, UNQ9341, C-type lectin domain containing 9A
Isotype :	Mouse IgG2a
Immunogen Information :	RBL-2H3 cells expressing human CLEC9A fused to an HA epitope

Description

CD370 / CLEC9A, also known as DNGR1, is a type II transmembrane glycoprotein with extracellular C-type lectin domain and intracellular ITAM-containing domain. Its expression is restricted to BDCA3+ conventional dendritic cells and to a subset of CD14+ CD16- monocytes. CD370 serves as a receptor for ubiquitous preformed acid-labile protein associated ligands that are exposed when the cell membrane is damaged, such as on necrotic cells. Its triggering by these ligands mediates recruitment and activation of the tyrosine kinase Syk and leads to their cross-presentation to the immune system.

Specificity : The mouse monoclonal antibody 8F9 recognizes an extracellular epitope of CD370 / CLEC9A (DNGR1), a type II transmembrane protein functioning as an endocytic receptor on BDCA31+ dendritic cells and on a subset of CD14+ CD16- monocytes.

Product Info

Amount :	0.1 mg
Purification :	Purified by protein-A affinity chromatography
Content :	1 mg/ml Formulation : Phosphate buffered saline (PBS) solution with 15 mM sodium azide
Storage condition :	Store at 2-8°C. Do not freeze.

Figure 1 : Flow cytometry surface staining pattern of human peripheral whole blood stained using anti-human CD370 (8F9) purified antibody (concentration in sample 1,67 µg/ml) GAM FITC.

Figure 2 : Flow cytometry multicolor surface staining of human myeloid cells stained using anti-human CD370 (8F9) purified antibody (concentration in sample 1,67 µg/ml, GAM FITC) and anti-human CD16 (3G8) APC antibody (10 µl reagent / 100 µl of peripheral whole blood).

Figure 3 :Separation of human CD370 positive CD16 positive dendritic cells (red-filled) from neutrophil granulocytes (black-dashed) in flow cytometry analysis (surface staining) of human peripheral whole blood stained using anti-human CD370 (8F9) purified antibody (concentration in sample 1,67 µg/ml) GAM FITC.
