## 30-2620: Anti-Human CD230 / Prion Antibody (Clone: EM-21)

Clonality: Monoclonal
Clone Name: EM-21
Application: WB
Reactivity: Human
Gene: PRNP
Gene ID: 5621
Format: Purified

Alternative Name: Major prion protein, PrP, PrP27-30, PrP33-35C, ASCR, CD230, PRNP, CJD, KURU, PRIP,

PRPC, prion protein

**Isotype:** Mouse IgG2a

Immunogen Information: Recombinant human prion protein

## **Description**

CD230 / Human prion protein (PrP), also known as PRNP, is a ubiquitously expressed GPI-anchored cell surface glycoprotein associating with lipid raft components and functioning as a signaling molecule. CD230 / PrP plays a role in apoptosis in a cell context-dependent manner, is involved in proliferation of epithelial cells and in distribution of junction-associated proteins in human enterocytes. Conversion of this normal cellular prion protein (PrPc) into an abnormal conformer (PrPSc) is the crucial step associated with triggering the pathogenesis of the prion neurodegenerative disorders, such as the Creutzfeld-Jakob disease (CJD). Whereas PrPc is rich in alpha-helices, the PrPSc form has higher content of beta-sheets and is resistant to proteinase K.

Specificity : The mouse monoclonal antibody EM-21 recognizes human prion protein (PrP). Diglycosylated form of PrP has  $\sim$  40 kDa, monoglycosylated form  $\sim$  30 kDa, and nonglycosylated form  $\sim$  19-21 kDa.

## **Product Info**

Amount: 0.1 mg

**Purification :** Purified by protein-A affinity chromatography

Content: 1 mg/ml

Formulation: Phosphate buffered saline (PBS) solution with 15 mM sodium azide

**Storage condition :** Store at 2-8°C. Do not freeze.
