

30-2626: Anti-Mouse CD2 Low Endotoxin Antibody (Clone : RM2-5)

Clonality :	Monoclonal
Clone Name :	RM2-5
Application :	Functional Assay, FACS , IP
Reactivity :	Mouse
Gene :	CD2
Gene ID :	12481
Format :	Low Endotoxin
Alternative Name :	LFA-2, Ly37, Ly-37,CD2 molecule
Isotype :	Rat IgG2b lambda
Immunogen Information :	Murine thymocytes

Description

CD2 belongs to T lymphocyte glycoproteins of immunoglobulin superfamily. Its interaction with CD58 stabilizes adhesion between T cells and antigen presenting or target cells. Relatively low affinity of CD2 to CD58 (as measured in solution) is compensated within the two-dimensional cell-cell interface to provide tight adhesion. Moreover, T cell activation induces increased CD2 expression and its lateral mobility, making easier contact between CD2 and CD58. Subsequently, T cell activation causes fixation of CD58-CD2 at sites of cell-cell contact, thereby strengthening intercellular adhesion. CD2 deficiency reduces intestinal inflammation and helps to control infection.

Specificity : The rat monoclonal antibody RM2-5 recognizes an extracellular epitope of CD2, a 50 kDa glycoprotein present on the human peripheral blood T lymphocytes and NK cells; also expressed by all thymocytes.

Product Info

Amount :	0.1 mg
Purification :	Purified by protein-A affinity chromatography 1 mg/ml
Content :	Formulation : Low endotoxin azide free phosphate buffered saline (PBS) solution, 0.2 µm filter sterilized. Endotoxin level is less than 0.01 EU/µg of the protein, as determined by the LAL test.
Storage condition :	Store at 2-8°C. Do not freeze.
