

30-2655: Anti-Human CD133 Antibody (Clone : W6B3C1)

Clonality :	Monoclonal
Clone Name :	W6B3C1
Application :	FACS , WB, IHC
Reactivity :	Human
Gene :	PROM1
Gene ID :	8842
Format :	Purified
Alternative Name :	Prominin 1, PROM1, AC133, PROML1, STGD4, prominin 1
Isotype :	Mouse IgG1
Immunogen Information :	WERI-RB-1 retinoblastoma cell line

Description

CD133 (prominin 1) is a 5-transmembrane glycoprotein with extracellular N- and intracellular C-terminus. CD133 function remains to be elucidated, but it can be used as a cancer stem cell marker. Its expression pattern in progenitor cells is similar to CD34, i.e. on hematopoietic stem cells in bone marrow, cord blood, neural stem cells, retinoblastoma, or endothelial precursor cells (not mature endothelial cells). It is being used for identification and isolation of hematopoietic stem cells, including isolation for stem cell transplantation. Expression of CD133 correlates with differentiation of human colon cancer cells.

Specificity : The mouse monoclonal antibody W6B3C1 recognizes the extracellular glycosylated epitope 1 on human CD133 (CD133/1), a 120 kDa glycoprotein of prominin family, expressed e.g. on progenitor cells. This antibody is important for identification of stem cells and tumor cells.

Product Info

Amount :	0.1 mg
Purification :	Purified from cell culture supernatant by protein-A affinity chromatography
Content :	1 mg/ml Formulation : Phosphate buffered saline (PBS) solution with 15 mM sodium azide
Storage condition :	Store at 2-8°C. Do not freeze.

Figure 1 : Flow cytometry analysis (surface staining) of human peripheral whole blood showing CD133 positive stem cells (blue) and lymphocytes (red) stained using anti-CD133 (W6B3C1) purified, GAM-FITC.
