12-8087: Anti-Human IL-6 (Sarilumab) - HRP

Clone Name: Monoclonal
Clone Name: Hu137
Application: ELISA
Reactivity: Human

Alternative Name: Interleukin-6, CDF; HGF; HSF; BSF2; BSF-2; IFNB2; IFN-beta-2

Isotype: Human IgG1k

Description

Expression Host: HEK-293

This non-therapeutic antibody uses the same variable region sequence as the therapeutic antibody Sarilumab. Sarilumab binds to the transmembrane and soluble forms of the IL-6 receptor. This product is for research use only.

IL-6 and its signaling pathway play a part in immune response regulation, inflammation, and hematopoiesis.2 Sarilumab is a research-grade recombinant human monoclonal IL-6 receptor antagonist. It specifically binds to both the transmembrane and soluble forms of the IL-6 receptor, thus inhibiting IL-6Â-mediated cis and trans-signaling in a dose-dependent manner.1 Therapeutic Sarilumab, also known by the trade name Kevzara, is currently used to treat Rheumatoid Arthritis1, however, as of March 2020, The Feinstein Institute of Northwell Health publicized a study on "a human antibody that may prevent the activity" of IL-6 for the treatment of COVID-19.3 Anti-Human IL-6 (Sarilumab) utilizes the same variable regions from the therapeutic antibody Sarilumab making it ideal for research projects.

Product Info

Amount : 100 μg

Concentration: 0.5 mg/ml

Content: This HRP-conjugated antibody is formulated in 0.01 M phosphate buffered saline (150 mM NaCl)

PBS pH 7.2 - 7.4, 1% BSA. (Warning: Use of sodium azide as a preservative will inhibit the

enzyme activity of horseradish peroxidase)

Storage condition : This horseradish peroxidase conjugated monoclonal antibody is stable when stored at 2-8°C. Do not frozza

not freeze.

Application Note

The suggested concentration for Alemtuzumab biosimilar antibody for staining cells in flow cytometry is $<=1.0~\mu g$ per 106 cells in a volume of 100 μ l. Titration of the reagent is recommended for optimal performance for each application. ELISA
