32-17554: Human SLC4A7 Protein, His Tag

Alternative Name : NBC2; NBC3; NBCN1; SBC2; SLC4A6

Description

The protein has a predicted molecular mass of 68.6 kDa after removal of the signal peptide. The apparent molecular mass of SLC4A7-His is approximately 100-130 kDa due to glycosylation. This locus encodes a sodium bicarbonate cotransporter. The encoded transmembrane protein appears to transport sodium and bicarbonate ions in a 1:1 ratio, and is thus considered an electroneutral cotransporter. The encoded protein likely plays a critical role in regulation of intracellular pH involved in visual and auditory sensory transmission. Alternatively spliced transcript variants encoding distinct isoforms have been described.

Product Info

Amount :	50 µg
Purification :	The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.
Storage condition :	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).Lyophilized proteins are shipped at ambient temperature.
