

12-9218: Anti-ALB antibody(DMC275), IgG1 Chimeric mAb

Clonality : Monoclonal
Clone Name : DMC275
Application : FACS
Reactivity : Human
Alternative Name : HSA, PRO0883, PRO0903, PRO1341

Description

This gene encodes the most abundant protein in human blood. This protein functions in the regulation of blood plasma colloid osmotic pressure and acts as a carrier protein for a wide range of endogenous molecules including hormones, fatty acids, and metabolites, as well as exogenous drugs. Additionally, this protein exhibits an esterase-like activity with broad substrate specificity. The encoded preproprotein is proteolytically processed to generate the mature protein. A peptide derived from this protein, EPI-X4, is an endogenous inhibitor of the CXCR4 chemokine receptor.

Product Info

Amount : 100 µg
Purification : Purified from cell culture supernatant by affinity chromatography
Content : Not Sterile
Storage condition : Store at -20°C for 12 months (Avoid repeated freezing and thawing)

Application Note

FACS 1/100

Figure 1. Flow cytometry analysis with Anti-ALB (DMC275) on Expi293 cells transfected with human ALB (Blue histogram) or Expi293 transfected with irrelevant protein (Red histogram).
