## 12-9053-B: Biotinylated Anti-41BB antibody(DM67), Rabbit mAb

Clonality: Monoclonal
Clone Name: DM67
Application: ELISA
Reactivity: Human

Alternative Name: TNFRSF9, 41BB, CD137, CDw137, ILA,

## **Description**

The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor contributes to the clonal expansion, survival, and development of T cells. It can also induce proliferation in peripheral monocytes, enhance T cell apoptosis induced by TCR/CD3 triggered activation, and regulate CD28 co-stimulation to promote Th1 cell responses. The expression of this receptor is induced by lymphocyte activation. TRAF adaptor proteins have been shown to bind to this receptor and transduce the signals leading to activation of NF-kappaB.

## **Product Info**

**Amount:** 100 μg

**Purification:** Purified from cell culture supernatant by affinity chromatography

Content: Not Sterile

**Storage condition:** Store at 2 °C-8 °C for 6 months

## **Application Note**

ELISA 1/5000-10000; FACS 1/100
