12-9275: Anti-CD40 antibody(DM101), Rabbit mAb

Clonality :	Monoclonal
Clone Name :	DM101
Application :	ELISA,FACS
Reactivity :	Human
Alternative Name :	CD40, Bp50, CDW40, MGC9013, TNFRSF5, p50

Description

This gene is a member of the TNF-receptor superfamily. The encoded protein is a receptor on antigen-presenting cells of the immune system and is essential for mediating a broad variety of immune and inflammatory responses including T cell-dependent immunoglobulin class switching, memory B cell development, and germinal center formation. AT-hook transcription factor AKNA is reported to coordinately regulate the expression of this receptor and its ligand, which may be important for homotypic cell interactions. Adaptor protein TNFR2 interacts with this receptor and serves as a mediator of the signal transduction. The interaction of this receptor and its ligand is found to be necessary for amyloid-beta-induced microglial activation, and thus is thought to be an early event in Alzheimer disease pathogenesis. Mutations affecting this gene are the cause of autosomal recessive hyper-IgM immunodeficiency type 3 (HIGM3). Multiple alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported.

Product Info

Amount :	100 µg
Purification :	Purified from cell culture supernatant by affinity chromatography
Content :	Not Sterile
Storage condition :	Store at -20°C for 12 months (Avoid repeated freezing and thawing)

Application Note

ELISA 1/5000-10000;FACS 1/100

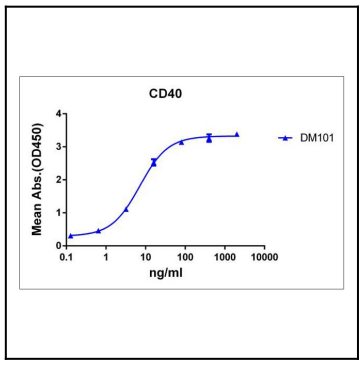

Figure 1. ELISA plate pre-coated by 2 Î¼g/ml (100 Î¼l/well) Human CD40 protein, mFc-His tagged protein can bind Rabbit anti-CD40 monoclonal antibody (clone: DM101) in a linear range of 0.64-80 ng/ml.
