## 12-9304: Anti-EGFR antibody(DM130), Rabbit mAb

Clone Name: Monoclonal
Clone Name: DM130
Application: ELISA,FACS
Reactivity: Human

Alternative Name: EGFR, ERBB, ERBB1, HER1, PIG61, mENA

## **Description**

The protein encoded by this gene is a transmembrane glycoprotein that is a member of the protein kinase superfamily. This protein is a receptor for members of the epidermal growth factor family. EGFR is a cell surface protein that binds to epidermal growth factor. Binding of the protein to a ligand induces receptor dimerization and tyrosine autophosphorylation and leads to cell proliferation. Mutations in this gene are associated with lung cancer.
