# 12-9358: Anti-IL2 antibody(DM187), Rabbit mAb 

| Clonality : | Monoclonal |
| :--- | :--- |
| Clone Name : | DM187 |
| Application : | ELISA,FACS |
| Reactivity : | Human |
| Alternative Name : | IL-2, lymphokine, TCGF |

## Description

This gene is a member of the interleukin 2 (IL2) cytokine subfamily which includes IL4, IL7, IL9, IL15, IL21, erythropoietin, and thrombopoietin. The protein encoded by this gene is a secreted cytokine produced by activated CD4+ and CD8+ $T$ lymphocytes, that is important for the proliferation of $T$ and $B$ lymphocytes. The receptor of this cytokine (IL2R) is a heterotrimeric protein complex whose gamma chain is also shared by IL4 and IL7. The expression of this gene in mature thymocytes is monoallelic, which represents an unusual regulatory mode for controlling the precise expression of a single gene. The targeted disruption of a similar gene in mice leads to ulcerative colitis-like disease, which suggests an essential role of this gene in the immune response to antigenic stimuli.

## Product Info

| Amount: | $100 \mu \mathrm{~g}$ |
| :--- | :--- |
| Purification : | Purified from cell culture supernatant by affinity chromatography |
| Content: | Not Sterile |
| Storage condition: | Store at $-20^{\circ} \mathrm{C}$ for 12 months (Avoid repeated freezing and thawing) |
| Application Note |  |

ELISA 1/5000-10000;FACS 1/100

Figure 1. Flow cytometry analysis with Anti-IL2 (DM187) on Expi293 cells transfected with human IL2 (Blue histogram) or Expi293 transfected with irrelevant protein (Red histogram).
