32-13781: MAOC Leishmania

Description

Source:Escherichia Coli. Physical Appearance:Sterile Filtered clear solution. Biological Activitynull null

Recombinant Leishmania Donovani Maoc Family Dehydratase-Like Protein produced in E.Coli is a single, non-glycosylated, polypeptide chain containing 157 amino acids having a molecular mass of 18 kDa. The Maoc Family Dehydratase-Like Protein is fused to a 6xHis tag at C-terminus and purified by proprietary chromatographic techniques.

Product Info

Amount : $0.25 \text{ mg} / 50 \mu\text{g}$

Purification: Protein is >95% pure as determined by 10% PAGE (coomassie staining).

Storage condition:

Maoc Family Dehydratase-Like Protein Recombinant although although stable at 4°C for 1 week,

should be stored below -18°C.
