

## 32-13787: PDCD1 Human, Active

**Format :** The PDCD1 solution (0.5mg/1ml) contains phosphate buffered saline (pH7.4) and 10% glycerol.

**Alternative Name :** Programmed cell death protein 1, CD279, hPD-1, SLEB2, hPD-I, hSLE1, PD-1, PD1, PDCD1.

### Description

Source:HEK293 Cells.

Physical Appearance:Sterile filtered colorless solution.

Biological ActivityMeasured by its binding ability in a functional ELISA with Human PD-L1/B7-H1

PDCD1 is a cell surface membrane protein of the immunoglobulin superfamily. PDCD1 is expressed in pro-B-cells and is thought to have a role in their differentiation. In mice, expression of PDCD1 gene is induced in the thymus when anti-CD3 antibodies are injected and large numbers of thymocytes undergo apoptosis. Mice deficient for the PDCD1 gene bred on a BALB/c background developed dilated cardiomyopathy and died from congestive heart failure. These studies suggest that the PDCD1 gene product may also be important in T cell function and contribute to the prevention of autoimmune diseases. PDCD1 Human Recombinant produced in HEK293 Cells is a single, glycosylated polypeptide chain containing 383 amino acids (21-170 a.a) and having a molecular mass of 42.9kDa.PDCD1 is fused to a 233 amino acid hIgG-His-Tag at C-terminus & purified by proprietary chromatographic techniques.

### Product Info

**Amount :** 20 µg / 5 µg

**Purification :** Greater than 95.0% as determined by SDS-PAGE.

**Storage condition :** Store at 4°C if entire vial will be used within 2-4 weeks.Store, frozen at -20°C for longer periods of time.For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Avoid multiple freeze-thaw cycles.
