

## 32-13807: Troponin C-I-T Complex

<b>Format :</b>	Troponin C-I-T Complex solution (0.2Åµm filtered) contains 25mM TRIS buffer, 0.15M NaCl, 0.09% sodium azide, pH 7.5.
<b>Alternative Name :</b>	Troponin I cardiac muscle, Cardiac troponin I, TNNI3, TNNC1, CMH7, RCM1, cTnI, CMD2A, MGC116817, Troponin C slow skeletal and cardiac muscles, TN-C, TNNC1, TNNC, TNC, CMD1Z

### Description

Source: Human cardiac tissue.

Physical Appearance: Sterile Filtered brown solution.

Biological Activity: null

Troponin Complex is a heteromeric protein playing an important role in the regulation of skeletal and cardiac muscle contraction. It consists of three subunits, Troponin I, Troponin T and Troponin C. Each subunit is responsible for part of Troponin Complex function. E.g. Troponin I inhibits ATP-ase activity of acto-myosin. Troponin T and Troponin I are presented in cardiac muscles in different forms than in skeletal muscles. Purified subunits of rcTnI, rcTnC and rcTnT are recomplexed in vitro under appropriate conditions.

Human Cardiac Troponin C-I-T Complex Protein produced in Human heart tissue having a molecular mass of approximately 75kDa.

### Product Info

<b>Amount :</b>	50 µg / 25 µg
<b>Purification :</b>	null
<b>Storage condition :</b>	Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
