32-13817: Tri a 14.0101

Format: Tri a 14.0101 is supplied in 20mM HEPES buffer pH-8.0, 200mM NaCl and 20% glycerol.

Alternative Name: Non-specific lipid-transfer protein, ltp142.

Description

Source:Sf9 insect cells.

Physical Appearance: Sterile Filtered clear solution.

Biological Activitynull

Tri a 14.0101 is a non-specific lipid transfer protein and a major wheat allergen. Those who are sensitive to this allergen may have bakerÂ's asthma, a frequent occupational allergic disease caused mainly by inhalation of cereal flour, especially wheat flour. Tri a 14.0101 consists of 4 helical fragments and irregular C-terminal regions which are highly stable to heat treatment and proteolytic attack.

Recombinant Non-Specific Lipid-Transfer Protein Tri a 14 produced in SF9 is a glycosylated, polypeptide chain having a calculated molecular mass of 13kDa. Tri a 14.0101 is expressed with a 6xHis tag and purified by proprietary chromatographic techniques.

Product Info

Amount : $100 \mu g / 50 \mu g$

Purification: Greater than 80.0% as determined by SDS-PAGE.

Storage condition:

Storage condition:

Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods af time. Avoid multiple frozen thank exclass.

of time. Avoid multiple freeze-thaw cycles.
