

### 30-2709: Anti-Hu Tomm34 Purified

<b>Clonality :</b>	Monoclonal
<b>Clone Name :</b>	Tomm34-4.1
<b>Application :</b>	WB, ICC, IP
<b>Reactivity :</b>	Human
<b>Gene :</b>	TOMM34
<b>Gene ID :</b>	10953
<b>Uniprot ID :</b>	Q15785
<b>Format :</b>	Purified
<b>Alternative Name :</b>	Translocase of outer mitochondrial membrane 34 URCC3, HTOM34P
<b>Immunogen Information :</b>	Recombinant human Tomm34

#### Description

Tomm34 (translocase of the outer mitochondrial membrane 34) is an additional component of the cellular chaperone system involved in protein folding. As the name suggests, Tomm34 was initially identified as being involved in mitochondrial protein processing. Subsequent studies have shown that Tomm34 interacts with both Hsp70 and Hsp90 and modifies their protein folding activities. In cancer, high levels of Tomm34 have been reported in bladder, colorectal and breast cancers compared to their normal tissue counterparts. In these cancers, Tomm34 promotes colorectal cancer cell growth and is a biomarker of poor outcome in early invasive breast cancer and bladder cancer. As a tumour-associated protein, Tomm34 peptide vaccination is under investigation as a therapeutic option for colorectal cancer, with significant Tomm34 cytotoxic T-lymphocyte (CTL) response observed.

Specificity :The mouse monoclonal antibody Tomm34-4.1 recognizes an epitope within TPR2 domain of human Tomm34 protein.

#### Product Info

<b>Amount :</b>	0.1 mg
<b>Purification :</b>	Purified by protein-A affinity chromatography.
<b>Content :</b>	Concentration: 1 mg/ml Storage Buffer: Phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide
<b>Storage condition :</b>	Store at 2-8°C. Do not freeze.
