30-2746: Anti-Hu CD95 PE-DyLight® 594 (Discontinued)

Clonality: Monoclonal

Clone Name: LT95
Application: FACS
Reactivity: Human
Gene: FAS
Gene ID: 355
Uniprot ID: P25445

Alternative Name: Fas cell surface death receptor FAS1, APT1, APO-1, FASTM, ALPS1A, TNFRSF6

Immunogen Information: HUT-78 human T cell lymphoma cell line

Description

CD95 (Fas, APO-1), a 46 kDa transmembrane glycoprotein, is a cell death receptor of the TNFR superfamily. Stimulation of CD95 results in aggregation of its intracellular death domains, formation of the death-inducing signaling complex (DISC) and activation of caspases. In type I cells caspase 3 is activated by high amounts of caspase 8 generated at the DISC, in type II cells low concentration of caspase 8 activates pathway leading to the release of cytochrome c from mitochondria and activation of caspase 3 by cytochom c. Besides its roles in induction of apoptosis, Fas also triggers pro-inflammatory cytokine responses.

Specificity: The antibody LT95 reacts with an extracellular epitope on CD95 (Fas/APO-1), a 46 kDa single chain type I glycoprotein of the tumour necrosis factor/nerve growth factor (TNF/NGF) receptor superfamily, expressed on a variety of normal and neoplastic cells. It seems that the antibody LT95 does not induce Fas mediated apoptosis, although it cross-blocks anti-Fas DX2 antibody that recognizes a functional epitope of Fas molecule.

Product Info

Amount: 100 Tests

Purified antibody is conjugated with activated tandem dye of R-phycoerythrin-DyLight®594

Purification: (PE-DyLight®594) under optimum conditions and unconjugated antibody and free

fluorochrome are removed by size-exclusion chromatography.

Content: Concentration: 1 mg/ml

Storage Buffer: Phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide

Storage condition: Store at 2-8°C. Protect from prolonged exposure to light. Do not freeze.

Application Note

Flow cytometry: The reagent is designed for analysis of human blood cells using 4 $\hat{A}\mu$ l reagent / 100 $\hat{A}\mu$ l of whole blood or 10^6 cells in a suspension. The content of a vial (0.4 ml) is sufficient for 100 tests.
