

30-2764: Anti-Hu CD69 FITC

Clonality :	Monoclonal
Clone Name :	FN50
Application :	FACS
Reactivity :	Human
Conjugate :	FITC
Gene :	CD69
Gene ID :	969
Uniprot ID :	Q07108
Alternative Name :	CD69 molecule EA1, AIM, MLR-3, CLEC2C, GP32/28, BL-AC/P26
Immunogen Information :	anti- μ -stimulated human B lymphocytes

Description

CD69 (C-type lectin domain family 2 C, CLEC2C, also known as AIM) is one of the earliest inducible cell surface molecules acquired during leukocyte activation. This glycoprotein serves as a lectin-type receptor in lymphocytes, NK cells and platelets; it is involved in lymphocyte proliferation. CD69 expression is counteracted on T cells in the AIDS stage of HIV infection, and may be also predictive for clinical response to chemoimmunotherapy.

Specificity :The mouse monoclonal antibody FN50 recognizes an extracellular epitope of CD69, an lymphocyte early activation marker.

Product Info

Amount :	100 Tests
Purification :	Purified antibody is conjugated with fluorescein isothiocyanate (FITC) under optimum conditions and unconjugated antibody and free fluorochrome are removed by size-exclusion chromatography.
Content :	Storage Buffer: Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide
Storage condition :	Store at 2-8°C. Protect from prolonged exposure to light. Do not freeze.

Application Note

Flow cytometry: The reagent is designed for analysis of human blood cells using 20 μ l reagent / 100 μ l of whole blood or 10^6 cells in a suspension. The content of a vial (2 ml) is sufficient for 100 tests.
