

32-17592: Recombinant Human CLEC2D Protein, N-His Tag

Uniprot ID : Q9UHP7

Alternative Name : CLAX, LLT1, OCIL

Description

Molecular Characterization: 6Å—His CLEC2D(Arg60-Val191)

Molecular weight: The protein has a predicted molecular mass of 16.2 kDa after removal of the signal peptide. The apparent molecular mass of His-CLEC2D is approximately 15-25 kDa due to glycosylation.

Description: Recombinant Human CLEC2D Protein with N-terminal 6Å—His tag

This gene encodes a member of the natural killer cell receptor C-type lectin family. The encoded protein inhibits osteoclast formation and contains a transmembrane domain near the N-terminus as well as the C-type lectin-like extracellular domain. Several alternatively spliced transcript variants have been identified for this gene.

Product Info

Amount : 100 µg / 50 µg

Content : Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.

Storage condition : Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).
Lyophilized proteins are shipped at ambient temperature.
