

## 32-17592: Recombinant Human CLEC2D Protein, N-His Tag

**Uniprot ID :** Q9UHP7  
**Alternative Name :** CLAX, LLT1, OCIL

### Description

Molecular Characterization: 6 $\text{Å}$ —His CLEC2D(Arg60-Val191)

Molecular weight: The protein has a predicted molecular mass of 16.2 kDa after removal of the signal peptide. The apparent molecular mass of His-CLEC2D is approximately 15-25 kDa due to glycosylation.

Description: Recombinant Human CLEC2D Protein with N-terminal 6 $\text{Å}$ —His tag

This gene encodes a member of the natural killer cell receptor C-type lectin family. The encoded protein inhibits osteoclast formation and contains a transmembrane domain near the N-terminus as well as the C-type lectin-like extracellular domain. Several alternatively spliced transcript variants have been identified for this gene.

### Product Info

**Amount :** 100  $\mu\text{g}$  / 50  $\mu\text{g}$

**Content :** Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.

**Storage condition :** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
